<b>Total Project Costs for SFY 2006</b>				<b>\$ 703,209,817</b>				

Note 1. The first criterion for hardship financial assistance requires that the municipality's median household income (MHI) is 80% or less of the state's MHI. Municipalities with a "Yes" in the "Meets MHI for Hardship?" column currently meet the MHI criterion for hardship financial assistance. A "No" in the hardship column means the municipality either:

- a) does not currently meet the MHI criterion;
- b) is intending to apply for a loan for a storm water project so is not eligible to apply for hardship assistance; or
- c) is a special district for which the CWFP doesn't have an MHI because the district didn't submit a district boundary map with its Notice of Intent to Apply and didn't request hardship assistance.

Note 2. The three projects shown in **bold** above are designated as ***federal equivalency projects***. This designation is explained in the "Federal Equivalency" article in this issue of ***Loan Interests***.

\*\*\*\*\*

Providing financial assistance to these proposed projects is not expected to have the potential to cause significant adverse environmental effects. Comments on this preliminary determination may be provided no later than June 30, 2005 to Ken Hollenzer - CF/8, Department of Natural Resources P.O. Box 7921, Madison WI 53707-7921.
